Document Body

Hi Tracey,

There hasn't been any new developments on the national core WQS promulgation yet. All the Regional Administrators are meeting in El Paso, TX today to discuss this issue with Assistant Administrator Chuck Fox and to talk over whether we should formally proceed. In the meantime, we're working at an unbelievable pace to write the Region 5 section of the rule and include the three sets of tailored standards - just in case they decide to proceed.

Hopefully, you've received my email messages about the standards you submitted for the promulgation. I'll probably need to work with you over the next couple of weeks to get a final version (ideally, by the end of March). If you need a faxed example of descriptions of Fond du Lac's designated uses, let me know. Also, I commented on your definitions and by the time I reviewed your antidegradation section, I realized that some of my comments on your definitions were not accurate. So, for now just concentrate on the numeric criteria comments and the designated uses comments. I'll try to get you the antidegradation and definitions sections finalized today. Hopefully, I can get you the last piece on the narrative criteria by Friday.

Regarding your wellhead QAPP, I'll be recommending a conditional approval. I just haven't had time to write the letter. Fridays are usually good days to catch up on things, so perhaps I can get it done then.

Your message says "And while I'm here, was there any response yet for the WHPP QAPP?" You aren't leaving are you? Or, do you just mean that after your baby is born, you might not be around for a while? Sure hope you stay there at Bad River. You have been doing an exceptional job for the Tribe.

Well... I'll be talking to you soon. Hope you are doing okay and not getting too much of that morning sickness! I remember how sick I was....and sleepy - so sick that I had to quit my job. Take care.

Kathy

Subject: Bad River question

Kathy,

Hi, I seem to have missed the water conference call (meetings here). I'll get the minutes I'm sure but I just wanted to know if there was any news on the Core Promulgation.

And while I'm here, was there any response yet for the WHPP QAPP?
